PROFILE

Business Analytics Master's student (ESPRIT School of Business) seeking a PFE Data Analyst internship.
Proficient in Python, SQL / PL/SQL, ETL (SSIS), Power BI (DAX) and Machine Learning, applied across three end-to-end projects: a dashboard, a predictive model deployed as a Streamlit application, and time series forecasting.

PROJECTS

Social Media Performance Analytics Dashboard — Power BI 2025

- Design of an interactive **Power BI** dashboard to analyze Facebook and Instagram performance.
- Data cleaning, transformation and modeling with **Power Query and DAX.**
- Tracking of marketing **KPIs**: engagement rate, conversion rate, impressions (Reach).
- Identification of performance trends and formulation of **recommendations** to optimize marketing campaigns.

Online Shopper Purchase Intention Prediction — Machine Learning 2025

- Development of a **predictive model** of purchase intention from more than 12,000 e-commerce sessions.
- **Data preparation, transformation and exploratory analysis** to identify the factors influencing conversion.
- Training and comparison of several classification algorithms (Logistic Regression, Decision Tree).
- Deployment of an **interactive application** in Streamlit to estimate visitors' purchase probability in real time.

Stock Price Forecasting — Time Series Analysis 2025

- Development of a **stock forecasting model** for the Eurocycles (ECYCL) stock using historical data.
- Automation of data collection and preparation using **Selenium** and **Python**.
- Performance of **statistical analyses** including trend and seasonality detection and stationarity tests.
- Design and evaluation of **ARIMA / SARIMA models** to generate forecasts and support decision-making.

SKILLS

Data Analysis & Python: Python, exploratory data analysis (EDA), data cleaning and preparation
Databases & ETL: SQL, PL/SQL (Oracle SQL Developer), SQL Server (SSMS), SSIS (ETL), NoSQL
BI & Visualization: Power BI, Power Query, DAX, data modeling, dashboards, KPIs
Statistics & Machine Learning: Classification (Logistic Regression, Decision Tree), time series (ARIMA, SARIMA), stationarity tests, trend and seasonality
Deployment: Streamlit, website or application (VS Code)
Tools: Office Suite (Excel), VS Code, Jupyter Notebook
Soft Skills: Teamwork, adaptability, initiative

EDUCATION

Professional Master's in Business Analytics | ESPRIT School of Business (ESB), Ariana, Tunisia 09/2025 – Present
